www.linkedin.com/in/ankithkumarsara

SKILLS

- **Languages**: Python, JavaScript, SQL
- **Web Technologies**: HTML5, CSS3, Node.js, Express.js, React.js, Next.js
- **Machine Learning**: Scikit-learn, TensorFlow, Keras
- **Tools**: Git, Docker, AWS, Jupyter
- **Databases**: MySQL, MongoDB
- **Other** : Problem Solving, Collaboration

EDUCATION

B.Tech, Computer Science, 2022- 2026
Specialization : General
Woxsen University, India

CGPA: 7.8/10

CERTIFICATIONS

- Python Programming Essentials - Coursera
- Introduction to Artificial Intelligence - Google
- Introduction to Website Development - Coursera
- React Basics - Coursera
- Data Visualization with Python - Coursera

PROFESSIONAL SUMMARY

Currently pursuing Bachelor of Technology in Computer Science Engineering at Woxsen University, with a strong focus on web development. Proficient in creating and designing websites, committed to building expertise in modern web technologies. Passionate about innovation, continuous learning, and delivering impactful digital experiences.

INTERNSHIPS

Full Stack Developer Intern | Aharyas, Hyderabad
November 2024 – May 2025

- Developed the Aharya website to showcase startup offerings and enhance user engagement with a unique, responsive design.
- Created an E-Commerce site for artisans to showcase their products. Collaborated with founders to align the platform with brand identity and address evolving needs
- Skills: React JS, TailwindCSS, and MongoDB

Full Stack Developer Intern | Invezoro, Hyderabad
May 2025 – August 2025

- As the lead website developer for INVEZORO, I am responsible for designing and building a user-friendly, responsive, and scalable web platform that reflects the organization's mission.
- The website highlights INVEZORO's focus on underserved communities, regional language support, and outcome-driven learning programs.
- Skills: React JS, TailwindCSS, AWS and Google Firebase

KEY PROJECTS

E-Commerce Web Application
Tech Stack: React.js, Node.js, Express.js, MongoDB, Razarpay API, AWS S3
November 2024 – January 2024

- Built a responsive e-commerce platform with user authentication & role-based access.
- Integrated Stripe & Razorpay for secure payments and order tracking.
- **Optimized** database queries, cutting API response time by **40%**.

AI-Powered Chatbot
Tech Stack: Gemini API, Node.js, React.js
March 2024 – April 2024

- Built an AI-driven chatbot for real-time customer query handling, reducing response time by **60%**.
- Implemented Gemini API, React.js for better user interactions.
- Deployed on Vercel for scalability and cost efficiency.

KEY PROJECTS

Book-Store web application
Tech Stack: React.js, Node.js, Express.js, MongoDB
March 2023 – May 2023

- Designed and developed a responsive Book-Store web application using React.js, enabling users to browse, and manage books seamlessly.
- Integrated state management using React hooks and Context API to ensure a smooth and interactive user experience.

AI Tour Planner
Tech Stack: Gemini API, React Native, Google Maps API, Google Firebase
May 2024 – July 2024

- Created an AI-powered travel planning app for personalized trip creation.
- Used advanced AI algorithms to analyze user preferences for tailored itineraries.
- Developed a user-friendly interface for easy navigation and enhanced usability.
- Skills: React Native, Firebase, Google Maps API, AI algorithm implementation, and API integration.

ACHIEVEMENTS

- Core Member – Diplomats Club, Woxsen University
- Top 5, 24 hr coding hackathon, Innoverse 2024
- Solved **20+** problems on LeetCode
