SUMMARY

Backend Developer with production experience building RESTful APIs, RAG pipelines, and AI-powered applications. Core contributor to Aharyas, a live e-commerce platform supporting Indian artisans. Experienced in owning the entire development lifecycle and delivering scalable products.

WORK EXPERIENCE

Full Stack Developer Intern | Aharyas

Nov 2024 – PRESENT

- Built and deployed an e-commerce platform using the MERN stack, delivering responsive UI components and REST APIs to enhance functionality and user engagement.
 - Optimized backend workflows and integrated core services, including database operations and Razorpay payment systems, improving application efficiency.
 - Collaborated with stakeholders to support 300+ artisan sellers and 100+ MAU, rapidly iterating on backend requirements to deliver high-priority features.
 - Automated CI/CD pipelines using GitHub Actions, reducing deployment time to under 5 minutes with zero deployment failures.
-

PROJECTS

Authentiq - React.js, Supabase, FastAPI, Python, HuggingFace | [Demo](#)

- Developed an NLP inference pipeline achieving 85% text classification accuracy by integrating transformer-based models with asynchronous FastAPI services.
- Built a semantic plagiarism detection engine using SentenceTransformers; optimized vector comparison and retrieval latency by 40%.

AI Video Gen - Next.js, Convex, Firebase, Inngest, Gemini AI | [GitHub](#)

- Designed an agentic text-to-video pipeline with multi-step LLM orchestration via Gemini AI, generating videos in under 60 seconds.
- Reduced pipeline failure rates by designing agentic workflows and event-driven orchestration via Convex and Inngest for automated job scheduling.

Demand Forecasting for Retailers - Python, SARIMA, LSTM | [GitHub](#)

- Built a hybrid forecasting model using 20K+ retail transaction records to improve demand prediction accuracy across seasonal datasets.
- Simulated inventory optimization strategies that reduced projected overstock events by ~20% through predictive forecasting and demand trend modeling.

AI Tour Planner - React.js, Firebase, Google Maps & Gemini AI APIs | [GitHub](#)

- Developed an AI itinerary platform generating 100+ personalized travel plans through Gemini AI.
 - Enhanced user experience and recommendation accuracy through intelligent route filtering and dynamic trip generation logic.
-

SKILLS

- **Languages:** Python, JavaScript, TypeScript,
 - **Frontend:** Next.js, React.js, Tailwind CSS, HTML5, CSS3
 - **Backend:** Node.js, Express.js, FastAPI
 - **Databases:** MongoDB, PostgreSQL, Supabase, MySQL, Firebase, Redis
 - **AI & LLM:** Hugging Face, NLP, RAG, LangChain, Gemini/OpenAI API, Prompt Engineering
 - **Cloud & DevOps:** AWS (EC2, S3), Docker, Kubernetes, GitHub Actions (CI/CD)
-

EDUCATION

B.Tech in Computer Science Engineering

Woxsen University | CGPA: 8.1/10 | Sept 2022 – Mar 2026

Relevant coursework: DSA, DBMS, Operating Systems, Machine Learning, Cloud Computing
